

On behalf of the Shelby County Board and the University of Illinois Department of Urban and Regional Planning we would like to express our gratitude for discussing the future development of the county with us at our local public forums. The information and localized insights from these sessions have proved valuable as we work to create a plan relevant to all residents and communities in Shelby County. We look forward to continuing the process and presenting a completed document for review by year's end.

Please join us at 7pm on September 16th at the County Courthouse for a presentation of issues identified during the information gathering phase of plan development.
